INTRODUCTION

Customer Journey Mapping is a visual representation of a customer's interactions and experiences with a brand. It helps marketers understand what customers think, feel and do at different stages of their journey.

In 2026, mobile devices play an important role in online shopping. The customer journey can be understood through four major stages:

1. Awareness2. Consideration3. Purchase4. Retention

This project maps these stages for a sample Amazon India customer persona named Boomikaa.

OBJECTIVES & METHODOLOGY

Objectives

- To map the customer journey of an Amazon India customer.
- To identify customer pain points at each stage.
- To understand customer emotions and behaviour.
- To provide practical recommendations for improving the customer experience.

Methodology

This project uses secondary research and observational analysis. Sources and methods include:

- Amazon app and website analysis
- SimilarWeb research
- Google Trends observations
- Analysis of 100+ Play Store reviews

The findings are used to create a representative customer journey map.

ABOUT AMAZON

Amazon was founded in 1994 by Jeff Bezos. Amazon entered the Indian market in 2013.

Amazon India operates primarily as an online marketplace and provides services such as Prime membership and digital payment-related features.

Key elements of the business model include:• Marketplace connecting sellers and customers• Prime membership and delivery benefits• Digital payments and related services

Amazon serves customers across India, including customers in Tier 2 and Tier 3 cities.

PERSONA BOOMIKAA – PART 1

Name: Boomikaa Age: 21 Location: Salem Education: Final Year B.Com Device: Redmi Android smartphone Budget: ₹5,000 pocket money Shopping behaviour: Primarily shops using mobile

Characteristics • Price sensitive • Checks offers and discounts • Waits for major sales • Prefers convenient delivery • Uses reviews before purchasing

Customer Persona - BOOMIKAA

ABOUT

- Age: 21
- Location: Salem
- Occupation: Final Year B.Com Student

DEVICE

- Redmi Android

BUDGET

- Rs.5,000 per month

GOAL

- Buy trendy at lowest price with free delivery

FRUSTRATIONS

- + Delivery charge Rs.40
- + Fake reviews
- + Late delivery

PERSONA INSIGHTS
Budget-conscious shopper seeks affordable trendy fashion. Values honest reviews & reliable free shipping.

PERSONA BOOMIKAA – PART 2

Goals• Buy trendy products at a low price• Get free or affordable delivery• Find genuine products• Receive products on time

Frustrations• Delivery charges such as ₹40 on smaller orders• Concern about fake or poor-quality products• Late delivery

Shopping BehaviourBoomikaa adds products to her wishlist and waits for a price drop before purchasing.

EMPATHY MAP BOOMIKAA

THINKS "Is this product original?"

FEELS Excited during sales but anxious about spending money.

SAYS "I check the reviews first."

DOES Compares products and prices with Flipkart before buying.

The empathy map shows that trust, price and reviews strongly influence the persona's decision.

AWARENESS STAGE

How Boomikaa discovers Amazon products:• Instagram Reel: “Haul Under ₹999”• YouTube advertisements during IPL-related content / sale promotions• Google search: “best earbuds under ₹2,000”• Recommendation from a friend: “Amazon la cheap.”

Customer Emotion: CURIOUS / INTERESTED

At this stage, advertising, social media content, search engines and word-of-mouth create awareness.

Amazon Customer Journey Mapping | Page 18

Amazon Awareness Stage Touchpoints

College Project — Understanding Customer Awareness Touchpoints | Great Indian Festival Campaign

Touchpoint 1: Instagram Reel

User discovers Amazon deals via influencer Reel, raising brand awareness during Great Indian Festival

Touchpoint 2: YouTube Ad

YouTube in-stream ad reaches audience during IPL live match, building awareness of Amazon sale

Awareness Stage: Goal is to introduce Amazon & Great Indian Festival to potential customers through social media discovery and video advertising during IPL

AWARENESS PAIN

Main Pain Point Ad fatigue: seeing too many advertisements within a short period can reduce attention and interest.

Example Persona Experience Boomikaa may see around five promotional advertisements within ten minutes, including advertisements that are not relevant to her interests.

Recommendation Use frequency capping so that the same customer does not receive excessive promotional advertisements within a short period.

Expected Result More relevant communication and less customer irritation.

CONSIDERATION STAGE

Boomikaa may spend 3–4 days considering a product.

Typical steps: 1. Search for earbuds. 2. Apply 4-star and Prime filters. 3. Open approximately five products. 4. Read 1-star reviews. 5. Check Q&A, including questions about small ears. 6. Compare with Flipkart. 7. Add the preferred product to Wishlist. 8. Search for a coupon or discount.

Customer Emotion: INTERESTED BUT CAREFUL

CONSIDERATION PAIN

Emotion: CONFUSED / OVERWHELMED

Pain Points• Too many choices, sometimes 200+ options. • Some reviews may appear unreliable or lack photographs. • Product prices can change frequently, for example from ₹1,499 to ₹1,899. • Comparing multiple sellers and products takes time.

These issues can increase the time required to make a purchase decision.

PURCHASE STAGE

Purchase Funnel Cart → Address: Salem hostel → Payment: UPI → Coupon: FESTIVE10 → Pay: ₹1,399 → OTP → Order Confirmed

Why Amazon? • Prime delivery benefits • Convenient delivery to Salem • COD availability where applicable • Easy return options

Emotion: ANXIOUS → HAPPY

Pain Points • Delivery charges may apply to lower-value orders. • Lack of Tamil-language support can be a barrier for some customers.

RETENTION STAGE

Example Customer Timeline
Day 1: Order shipped
Day 2: Product delivered
Day 4: Customer receives request to rate product
Day 15: Promotional / membership offer

Retention Tools
• Prime membership
• Subscribe & Save for eligible products
• Payment cashback offers where available
• Personalized recommendations
• Return and pickup services where applicable

Pain Points
• Too many push notifications, such as 3–4 per day.
• Automated customer-care interactions may not resolve every issue quickly.

PAIN POINT TABLE

Amazon Customer Journey Mapping | Page 18

Customer Journey Map - Amazon - Persona: Boomikaa

Persona: Boomikaa • 21-year-old female student from Salem

Age: 21 • Location: Salem • Occupation: College Student • Goal: Buy affordable college essentials online

STAGES	Awareness	Consideration	Purchase	Retention
1. Touchpoints	Instagram Reel	YouTube Ad	Amazon Search Filters	Cart → UPI Payment Push Notifications
2. Boomikaa's Actions	Sees Instagram Reel about college essentials sale; scrolls while studying	Watches YouTube reviews; compares products & prices on Amazon app	Adds items to cart; applies filters for price & delivery; proceeds to pay via UPI	Receives order; uses product; gets push notification for reorder & offers
3. Emotions	Curious	Confused / Overwhelmed	Anxious	Happy → Loyal Loyal / Irritated
Pain Points	Ad fatigue	Fake reviews Choice overload	₹40 delivery charge No Tamil language option	Spam notifications
Key Insights Opportunity to add Tamil language support for Salem users Reduce spam to improve loyalty			Recommendation Localized content & offers; transparent reviews & free delivery threshold	

RECOMMENDATIONS & CONCLUSION

Recommendations
1. Introduce an AI-powered review summary to highlight common customer opinions.
2. Allow customers to compare up to four products easily.
3. Provide price-drop alerts only when the price falls by more than 10%.
4. Improve Tamil-language support for customers in Tamil Nadu, including Salem.
5. Offer student-focused Prime promotions where applicable.
6. Limit promotional notifications to a reasonable frequency, such as a maximum of two per day.
7. Provide a simple one-click return process and faster refund communication.

Conclusion
Amazon provides a strong digital shopping journey through product variety, delivery services, reviews, payment options and returns. However, the journey can be improved by reducing choice overload, improving trust signals, making communication more relevant and simplifying customer support and returns.

Expected Impact
The recommendations are intended to improve customer satisfaction, engagement and retention.

Stage	Pain Point	Impact
Awareness	Ad fatigue / irrelevant ads	Reduced attention
Consideration	Choice overload / review concerns	Decision delay
Purchase	Delivery charges / language barrier	Cart abandonment risk
Retention	Too many notifications / bot support	Customer irritation
